CiviKos, with the support of DEMOS have created the **Social Audit group in Rahovec**.

Project	Construction of Infrastructure for Persons with Special Needs (Rahovec, Xerxe, Fortese, Krushe e Madhe, Celina, Hoqe e Vogel, Opterushe, Malesi e Vogel, Ratkoc, Dejn and Qifllak)
The total price of the works in the contract	EUR 71,569.00
Status of the contract	Completed

The Social Audit Group has 21 members.

KEY FINDINGS

The municipality of Rahovec has not organized a special consultation with the citizens.

There is a lack of ramps in public spaces with frequent attendance.

Some of the ramps located in the city of Rahovec are narrower than the permitted standard for pass of a person with a wheelchair.

There is a lack of vertical and horizontal signalization in the city of Rahovec that informs about the paths for people with special needs.

Some of the buzzers placed at the traffic lights in the city of Rahovec do not work at all, or their sound is too weak to be heard by the users.

There have been delays in implementation of the project

RECOMMENDATIONS

1 An elevator should be installed in the Municipality building to enable persons with special needs to have full access to the municipality building.

2 To place ramps in Rahovec Square after the construction of the Square.

3 To ensure the maintenance of fences, ramps, vertical and horizontal signs.

4 To look at the possibility of widening the ramps where they are narrower than the standard and to adjust the buzzers at the traffic lights.

5 To build ramps in highly visited public places, starting from the Municipality building.
